Kratos Network Empowerment Group LLC Programming Solutions

Grace and Peace to you my dear friend. This letter was developed with the purpose of bringing you clarity about our mission to reach the world and our service to you as a broadcasting network.

I understand that ministries large and small share the same calling as it relate to the word of God. God's call for us to reach the world with his message of Redemption, Salvation and Power is summed up by the simplicity of one word, Go. In my attempt to fulfill this Great Commission in Matthew 28:16-20 I have with great prayer and seeking the Lord, trusted by faith the vision given me. Your TV is about to become more like your tablet or your smartphone. A company named Roku showed off their new TV at the consumer electronics show in Las Vegas.

The Roku TV aims to merge online TV with cable TV. Roku is known for making affordable set top boxes that bring online streaming content to your television. Now they want to take the technology from their boxes and put it straight inside your television.

Kratos Network Empowerment Group LLC Programming Solutions streaming experience coupled with our robust content delivery network has made us the ideal choice to help us deliver, manage, and monetize media content on all popular platforms, including PC/Mac, iOS devices, Android, Blackberry, Nokia, Smart TV and set-top boxes such as Roku.

Roku announced the news at The Consumer Electronics Show in Las Vegas. The show officially kicks off this week but this announcement makes it clear that battle for control of your television. We can reach the world together with 24/7 Christian Programming that changes lives forever in Jesus name.

The Roku TV box is one of the most powerful tools used today for evangelism. Your ministry can now be viewed on television with millions of viewers that will have direct access to you through our network channel.

The Roku TV box burst on the scene in 2008 they were one of the only ways to bring Netflix streaming to your living room. Over time, Roku added a slew of apps to the boxes like FOX News but the problem with that model is that there are so many other ways to do that. Think about how smart TV's, video game consoles,

and Apple TV can all do the same or similar functions. In this competitive market Roku must have known that a little box that sits next to the TV wouldn't cut it anymore; they had to go inside the TV.

At launch Roku TV will partner with Hisense and TCL. The company says it will be available this Fall in screen sizes ranging from 32" to 55".

Roku, Inc., is a privately held company located in Saratoga, Calif., and founded in 2002 by Anthony Wood, the inventor of the digital video recorder (DVR). The market leader in streaming entertainment devices for the TV with millions of units sold, Roku has always believed that anything you want to watch, listen to, and enjoy should simply be there on your TV, whenever you want it. Roku streaming players are renowned for their simplicity, variety of entertainment choices, and exceptional value. Global Family Empowerment Ministries Network TV (GFEM Network TV) is the catalyst being used to reach the world on a global level. Your partnership is pivotal to our growth and without your ministry broadcasting on our network this blessing to so many souls will be lost.

This extremely powerful Content Delivery Network (CND) Video Platform was developed with outreach in mind. We are now one of the most powerful streaming providers on the net.
